**DETAILED ACTION**

***Election/Restrictions***

Restriction to one of the following inventions is required under 35 USC 121:

- I. Claims 1-6, and 13 are drawn to a print job ticket printing system, classified in class 358, subclass 1.15.
- II. Claims 7-9, and 14-15 are drawn to a printing data creating apparatus, classified in class 709, subclass 203.
- III. Claims 10 and 16 are drawn to a printing apparatus, classified in class 358, subclass 1.18

Inventions II and III are related as subcombinations disclosed as usable together in a single combination (i.e. the print system of invention I). The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II, which is related to a printing data creating apparatus the creation of information, has separate utility such as being able to create data for a variety of other devices, which may not necessarily be the print system as being claimed in invention I or the printer in invention II. Likewise, the printing apparatus of invention III would be able to print a data using job tickets, but these tickets do not necessarily have to be created using the print data creating apparatus of invention II. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
